IMPROVED MODULAR TACTICAL VEST

www.body-armor.com

IMTV

Specially designed to provide exceptional scalability, protective coverage and maneuverability according to mission requirements, the **Improved Modular Tactical Vest (IMTV)** provides more efficient weight distribution, enhanced protection to the lateral torso, with less exposed area on the sides and under the arms. Ideal for quick donning and doffing, this high performance vest also features a 2-point cut away system, 360° MOLLE compatible webbing attachment points for pouches, and lower back, groin, neck/throat protection and an internal cummerbund for optimal fit.
