PARACLETE[®]
PROVEN UNDER FIRE

Protect and Enhance Lives

Mission Statement:

We design, produce and deliver the highest quality protective solutions in the world. We accomplish this by driving innovation, continuously improving our quality management system and exceeding customer expectations.

PARACLETE® is committed to developing, manufacturing and delivering the most advanced tactical body armor and other protective solutions. Our products are world-renowned for their specialized designs and extreme adaptability in form, fit and function. PARACLETE® continues to break new ground in developing technologically advanced, mission-specific equipment by not only working closely with members of the law enforcement, special operations and military communities, but also by adapting their needs to meet tomorrow's emerging threats.

As hostile conditions continue to intensify globally, PARACLETE® will continuously drive the development of next-generation, tactical body-armor systems while rapidly responding to the needs of our customers. Our products are thoroughly field tested to exacting requirements and consistently surpass industry standards. Never standing still, PARACLETE® is leading the charge against emerging threats and ensuring unparalleled ballistic performance for those who serve to protect society.

PARACLETE®
P R O V E N U N D E R F I R E

Since the value of body armor has become so clear in light of today's hostile conditions, our engineering team and ballistic specialists take extraordinary measures in ensuring that our armor is consistent with the needs of our customers.

We continuously monitor the law enforcement and corrections communities to assess the potential of new street and institutional threats. Once a new product is available, our highly trained technical support specialists routinely perform live-fire shoot demonstrations nationwide. These events allow law enforcement officials and our distributors an opportunity to experience the exceptional performance of our ballistic systems first-hand.

P R O V E N

Protecting your community starts with equipping yourself with body armor that not only meets the highest level of protection but also exceeds your expectations for lightweight comfort and performance. At PARACLETE®, we're constantly pushing the limits beyond what you thought was possible in ballistic technology. As part of Point Blank Enterprises' family of brands, we currently have more NIJ .06 certified products than any other ballistics company in the industry with a key emphasis of providing our customers with lighter, more flexible body armor systems with greater ballistic capabilities. More officers trust the PARACLETE® brand because when it comes to meeting your needs for life protecting technology, your expectations can never be too high.

- 
- **Exceeds NIJ .06 Testing Requirements**
 - **Surpasses Industry Standards**
 - **Protects Beyond Your Expectations**

Inside our world-class PBEI Technology and Testing Center, a state-of-the-art ballistic laboratory allows us to continuously develop maximum-performance products which consistently exceed National Institute of Justice (NIJ), U.S. Military, Government (DEA and FBI) and International testing requirements. The Center also includes a dedicated R&D Garment Design Department that designs cutting-edge concealable and tactical carriers and a host of tactical accessories with the highest level of ergonomic fit and finish. This combination of ballistic expertise and garment design provides a seamless culmination of the most advanced body armor systems that are unparalleled in ballistic protection and comfort.

At PARACLETE®, we know the complex and ever changing threats law enforcement, federal and corrections officers face each day and intrinsically understand your needs for optimum ballistic protection. We strive to produce systems that combines maximum comfort and mobility with split-second adaptability. We are excited to offer you the latest advancements in ballistic technology and more options according to your required threat level and specifications for weight and performance.

born from science.

ALPHA ELITE

proven by the elite.

First Among The Finest

Battle-tested by the military elite and now available for law-enforcement professionals, the Alpha Elite Series doesn't just surpass previous levels of performance and comfort. It creates an entirely new standard.

A Revelation: Dyneema® Force Multiplier Technology by DSM

The Alpha Elite Series is the first body armor to be based on Dyneema® Force Multiplier Technology by DSM. It breaks new ground in polymer science and ballistic technology. DSM Dyneema started with Dyneema, the world's strongest fiber, and made it even stronger. In its unique unidirectional construction, it results in body armor weighing just .87 pound per square foot, achieving a new low in weight and a new high in flexible, all-day comfort. But there's much more to the Alpha Elite story:

- Created for—and combat-proven by—elite U.S. special-operations forces
- Multi-hit and special-threat performance that exceeds FBI protocol
- Available in concealable and tactical configurations
- NIJ Standard 0101.06 compliant

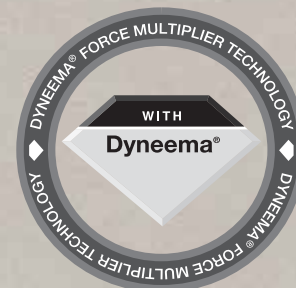

ALPHA ELITE

declassified.

Introducing the Revolutionary Alpha Elite Series by Point Blank Body Armor

This may be all you need to know about the new Alpha Elite Series:

During independent tests at Chesapeake Testing, the Alpha Elite AXIII A ballistic package exceeded all test-performance requirements, including tests for maximum velocity. These tests included rounds approaching or exceeding 2,000 fps. The test-lab personnel stated that they had never seen this level of performance in a package of this weight and thinness during the testing of soft-armor ballistic solutions.

TACTICAL

PARACLETE's full-line of mission adaptable Tactical Body Armor Systems are exclusively designed to meet the demanding needs of high-risk tactical teams. Each vest features a fully-integrated modular design that offers instant adaptability, time-tested reliability and the most technologically advanced ballistic systems available today. More SWAT officers trust our tactical vests because when it comes to responding to dangerous missions, they know there's no compromise when it comes to total protection.

Features

Selective Point Release System (SPRS) allows you to select the exact location the vest releases

Multiple points of release reduce the risk of accidental full release under dangerous conditions

Single, center-point ballistic suspension

Multi-Cummerbund Attachment System

Internal cummerbund for enhanced stabilization

Bungee external cummerbund stabilizer

Protective channels for internal cummerbund

Hidden cable-routing openings

VELCRO® attachment area for Collar Protector and Throat Protector

Throat/collar connection has two adjustment settings

Built-in, over-shoulder ballistic protection

Removable shoulder strapping system offers up to 2.5" range of adjustment

Removable front flap features Kangaroo pouch that accommodates three AR15/M16 mag inserts

Front and back, bottom-loading plate pocket accepts 8" x 10" or 10" x 12" hard-armor plates and ESAPI

Adjustable-plate height strap

Standard 3" x 10" ID panels

Magazine divider inserts (Standard with Triple M4/AR15)

All accessories have the ability to insert ballistics

Available with optional collar, throat, bicep and groin protectors

ALPHA-1 TACTICAL ARMOR SYSTEM

The revolutionary Alpha-1 tactical armor system offers high-performance ballistic protection integrated in a fully functional and scalable design to meet the strategic needs of your specific mission. With split-second precision, the Alpha-1 vest can immediately be released in two quick movements without the use of hardware or cables. It also provides multiple points of adjustability for greater comfort and maximum freedom of movement. This gives it the versatility to adapt to any condition.

RMV II

The newly designed Releasable Modular Vest (RMV) provides optimum protective coverage and extreme versatility in fit while allowing maximum freedom of movement. Ruggedly durable and designed to be highly adaptive, the RMV II is incredibly modular in construction and offers the ideal combination of form, fit and function.

Features

Accommodates SPEAR / BALCS ballistics

Durable 500 denier Cordura® outershell construction

Internal side pockets accommodate 6"x 6" plates

Patented single point release system that includes a low profile cutaway handle and integrated wire management system

Internal, bottom-loading hard armor plate pockets in the front and back for additional protection

2-piece, releasable and adjustable cummerbund system

Front flap includes kangaroo pouch that holds three 30 round AR15/M16 mags

High visibility, removable identification in the front, back and biceps

Maximum MOLLE Compatible Webbing System

Removable collar and throat protection (Optional)

Ergonomically shaped bicep protector (Optional)

Groin protector with webbing to accommodate additional accessories (Optional)

Lower back protection (Optional)

019 Model accommodates ESAPI hard armor plates

024 Model accommodates standard 10" x 12" hard armor plates

SUPER HORNET

Specifically developed to enhance mobility and provide maximum load bearing capabilities, the Super Hornet can adapt to any tactical mission with split-second precision. Easy to don and doff and incredibly durable in its construction, the Super Hornet offers the ultimate combination of protection, functionality and performance

Features

2-point emergency release system

Full ballistic coverage

Scalable carrier design accommodates additional collar, throat, biceps, and groin protection

MOLLE compatible webbing system

Universal front and back plate pockets accommodate 8" x 10", 10" x 12" and ESAPI hard armor plates

FTOC

The FTOC offers a new, innovative approach to body armor design. This highly scalable, side-opening carrier allows tactical units the flexibility to configure the body armor system to meet mission specific needs. This includes the capability to reduce from higher to lower levels of protection, while enhancing mobility, agility and substantially improved range of motion for the wearer.

Front

Features

Ergonomic carrier shape offers optimum protective coverage while maintaining maximum maneuverability

Exceptionally strong and durable 500 denier outershell construction

Integrated torso padding system placed within the internal spacer mesh lining improves airflow and breathability

Padded shoulder strapping system provides adjustability and load bearing support

Internal cummerbund helps stabilize the vest and provides a secure fit

Internal, bottom-loading, hard armor plate pocket in the front and rear

Easily accessible wire routing channels

Three heavy duty, reinforced "man down" strap

MOLLE Compatible Webbing Attachment System

High visibility, removable identification in the front and back

UPGRADE YOUR PROTECTION

SOHPC

The SOHPC was designed for Special Operations Forces and is PARACLETE's latest hard plate carrier. It has been innovatively designed to provide unmatched comfort, protection and flexibility to meet the needs of every mission. Through the addition of an adjustable cummerbund and internal side plate pockets for 6" X 6" hard armor plates, the SOHPC is the operator's choice for today's missions.

Features

Available with or without NIJ .06 Level IIIA ballistic inserts

Internal side plate pockets hold low-profile hard plates. Plate location can be adjusted for comfort and securely held in place with Mil Spec hook and loop straps and innovative flap closure system

Front and rear pockets for ESAPI style rifle plates with hook and loop closures

Cummerbund accommodates soft ballistic inserts

Side closure includes cummerbund and adjustable elastic harness to provide a snug fit and accommodate multiple waist sizes

Removable cummerbund easily converts into lightweight stand-alone plate carrier

Padded shoulders provide increased comfort during long-term wear

New front pull shoulder straps adjust easily. Shoulders include retention loops for increased stability and routing of cables

MOLLE-style webbing accommodates all PARACLETE and all MOLLE-compatible modular pouches that are designed to fit your mission-specific needs

New drop-down front flap has increased load-bearing capacity without sagging

Accommodates long magazines without impeding vest removal

019 Model accommodates ESAPI and XSAPI hard armor plates

024 Model accommodates 8" x 10" or 10" x 12" hard armor plates

TACTICAL ACCESSORIES

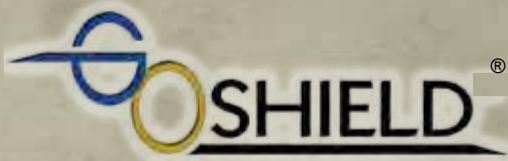

Hard armor

Engineered to meet the unique needs of the first responder, we offer a variety of hard armor plates ranging in construction from ceramic/aramid to ultra-lightweight polyethylene. Offered in NIJ Level III, IV or Level III/IV In-Conjunction with Level IIIA, these plates provide superior protection from high velocity rounds. Available in different sizes, shapes and curvature options, our hard armor plates can meet the needs of any mission in the most extreme operating environments.

TACTICAL HELMETS

Constructed of high performing and lightweight aramid fibers in a composite matrix, our helmets provide solid protection against handgun bullets (9mm and .44 Magnum) and fragments. Our highly innovative helmet designs incorporate the latest bullet-resistant safety standards, customized sizing, ergonomic comfort, and technical functionality, developed specifically for law enforcement and military operations.

Revolutionizing the way shields are used, the Go Shield® fulfills a gap that hard shields cannot match. Light weight and exceptionally durable, this hands-free shield includes an ambidextrous quick release, adjustable padded sling, hard armor plate pockets to allow for protection against rifle bullets, and other key features. All this and it can be rolled up and secured to itself ready for quick deployment.

Features

Soft ballistic panels allow shield to unroll and provide instant protection
(Separate storage bag included)

Total 40 inches in length - provides protection to major bone and joints

Ballistic suspension system ensures optimum protective coverage

Upper flap unrolls and suspends from vehicle door, boat rail, or support for breaching

Pull tab for easy deployment

Front plate pocket for use with 10" x 12" stand alone certified hard armor plates in Level III or IV (Hard armor plate not included)

Easy access long pockets for housing of rods ensures ability of shield to perform in a more rigid fashion when shot

Rigid rods provide framing reinforcement of shield

Return-to-Center mechanism for maintaining upper rod placement when shooting hands-free

Elastic tension for long rod pockets for securing rods in an active environment

Small pockets for shield lean back provides instant protection in a prone position

Rigid rubber upper handle for maintaining grip integrity

Lower strap handle allows for two handle application in vertical or horizontal positions

Multiple D-rings and fasteners to attach the sling

Sling permits hands-free shooting with pistol

Additional attachment points for use of adjusted sling with long guns (Second sling available as option)

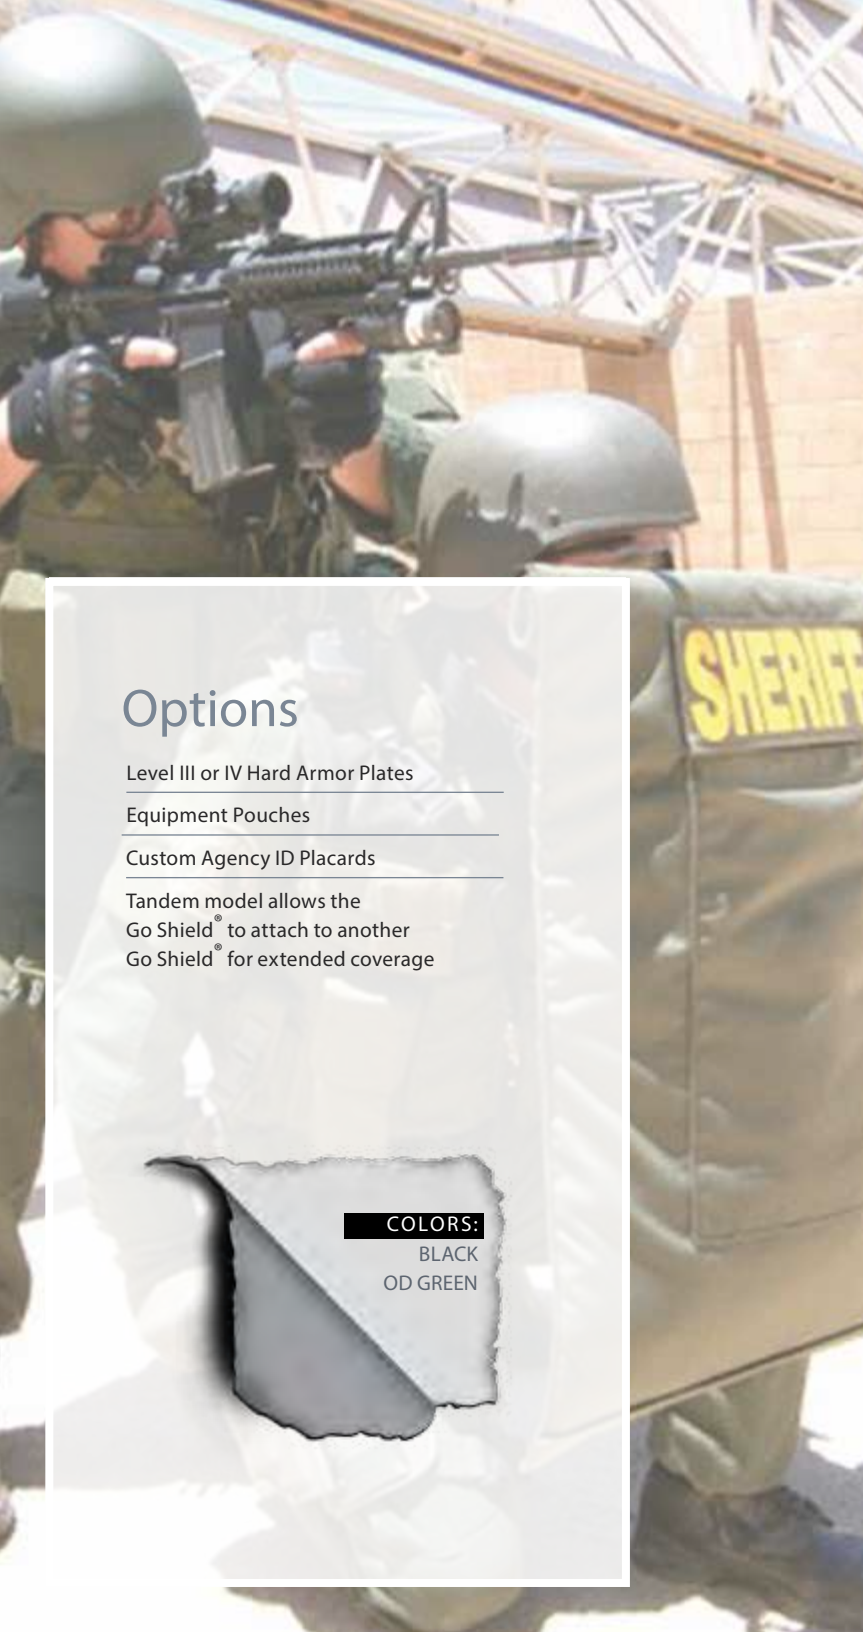

Several points of attachment for slings enables cross-point or backpack style carry

MOLLE Compatible webbing allows for adjustments of slings and shield height

Folding positions to 30" or 25" allows for use in confined spaces

Bottom loading flap for ballistic panel insertion

Optional extra shoulder strap

Options

HARD ARMOR PLATES

We offer several types of Hard Armor Plates capable of defeating high-powered Level III & IV rifle rounds either in combination with soft body armor systems or as a stand-alone. These plates are available in a choice of two shapes (full-size or shooter's cut), designed to meet your individual needs for comfort and function. Additional options include the choice of ultra-light polyethylene or ceramic plates which will affect weight and thinness.

Model 10260 - NIJ 0101.06 Level III Stand Alone

Average V50: 3130 fps
Sizes Available: 10"x12" Shooter's Cut or 10"x12" Full Size Cut
Curvature: Multi Curve (SAPI/ESAPI)
Construction: Ultra high molecular weight polyethylene
Thickness: 1.00"
Weight for 10" x 12": Shooter's Cut is 3.0 lbs.
Full-Size Cut is 3.2 lbs.

Model 10079 - NIJ 0101.06 Level IV Stand Alone Plate

Average V50: 3194 fp/s
Sizes Available: 6"x8", 8"x10", 10"x12"
Curvature: Triple Curve
Construction: Alumina Ceramic / Aramid
Thickness: 1.00"
Weight for 6"x8": Full-Size Cut is 2.9 lbs.
Weight for 8"x10": Shooter's Cut is 4.9 lbs.
Full-Size Cut is 5.3 lbs.
Weight for 10" x 12": Shooter's Cut is 7.5 lbs.
Full-Size Cut is 7.9 lbs.

Model 30260 - Level III Stand Alone Plate

Sizes Available: 6" x 6", 6" x 8", 8" x 10", 10"x12"
Curvature: Multi-Curve
Construction: Polyethylene
Thickness: 1.05"
Weight:
6" x 6" Full Size is 0.8 lbs.
6" x 8" Full Size is 1.0 lbs.
8" x 10" Shooter's Cut is 1.6 lbs.
8" x 10" Full Size is 1.7 lbs.
10" x 12" Shooter's Cut is 2.3 lbs.
10" x 12" Full Size is 2.7 lbs.

Model 10360 - Level III+ Stand Alone Plate

Sizes Available: 6" x 6", 8" x 10", 10" x 12"
 Curvature: Multi-Curve (8"x10" and 10"x12")
 Single Curve (6"x6")
 Construction: Polyethylene and Ceramic
 Thickness: 1.25"
 Weight:
 6" x 6" Full Size is 1.52 lbs.
 8" x 10" Shooter's Cut is 2.92 lbs.
 8" x 10" Full Size is 3.33 lbs.
 10" x 12" Shooter's Cut is 4.41 lbs.
 10" x 12" Full Size is 5.30 lbs.

Model 10046 - Level III/IV Plate in-Conjunction with Level IIIA Soft Armor*

Level III ICW Average V50: 3586 fps
 Level IV ICW Average V50: 3080 fps
 Sizes Available: 10"x12"
 Curvature: Triple Curve
 Construction: Alumina Ceramic / Aramid
 Thickness: 1.2"
 Weight for 10" x 12": Shooter's Cut is 7.1 lbs.
 Full-Size Cut is 7.5 lbs.

**Independently tested to full NIJ .06 certification requirements for Levels III and IV (ICW Level IIIA) – Not NIJ Certified*

SPEED PLATES

Ultimate in lightweight armor protection

The **SPEED** Plate is a lightweight polyethylene plate that is specially designed to be inserted into concealable body armor. **SPEED** Plates provide exceptional ballistic, spike and blunt trauma protection. Special threats tested, **SPEED** Plates provide the ultimate lightweight protection against exotic rounds.

RIOT HELMET

The **PACA RIOT HELMET** provides outstanding protection and superior comfort. It features an optically clear, UV resistant, polycarbonate face shield with an integrally molded liquid seal. Trusted by thousands of law enforcement agencies around the world to protect their valuable men and women in any riot situation, our Riot Helmet provides the ultimate in high-level impact protection with excellent optical properties.

Features

TacElite EPR polycarbonate alloy helmet shell

Expanded polystyrene liner with padded, sweat wicking inner liner

Permanently mounted neck protector with Kydex® penetration shield and shock absorbent foam pad

Detachable .150" (3.8mm) thick face shield with liquid seal prevents liquids from seeping into officer's eyes

Molded lip on top edge of face shield prevents shield from closing over integral visor and striking the face

Double D-ring fastener provides maximum strength and slip resistance.

Optional NIJ compliant quick release buckle available

HELMET ACCESSORIES

We offer a variety of padding options which provide the comfort you can feel and protection you can count on. Available in single or multi density foam pads, the wearer can select either Standard or upgrade to Deluxe to maximize comfort and achieve the ultimate fit.

Standard 7-Pad

- .75" suspension system consisting of 7 fabric covered
- Single density foam pads (2 traps, 4 oblongs, 1 circular crown)
- VELCRO® hook coin fasteners
- Available in Black only

Deluxe 7-Pad

- .75" suspension system consisting of 7 fabric covered
- Multi density foam pads (2 traps, 4 oblongs, 1 circular crown)
- VELCRO® hook coin fasteners
- Available in Gray or Black only

Mesh Suspension

- 4 point single piece unit
- Adjustable for all sizes and shapes of helmets
- Breathable and extremely light
- Temple to temple leather frontal pad
- Mesh crown
- Single point circumference adjustment
- Large rear VELCRO adjustment for depth
- Not suitable for Boltless retentions
- Available in Black only

Our Helmet Retention Systems provide the ultimate in stability and adjustment while remaining lightweight and durable. Compatible with a wide variety of helmet liner systems, as well as the most common ballistic shell styles, the PARACLETE® Standard, Deluxe or Boltless options ensures the most secure fit and optimal performance in the most harsh conditions.

Standard Retention

- 4 point nylon webbing retention in Black only

Deluxe H-Back Retention

- 4 Point .75" Nylon Webbing retention
- Large nape pad
- Heavy duty chin strap clip and slide adjusters
- Available in Black, Tan, Foliage and Camo Green

Boltless Retention

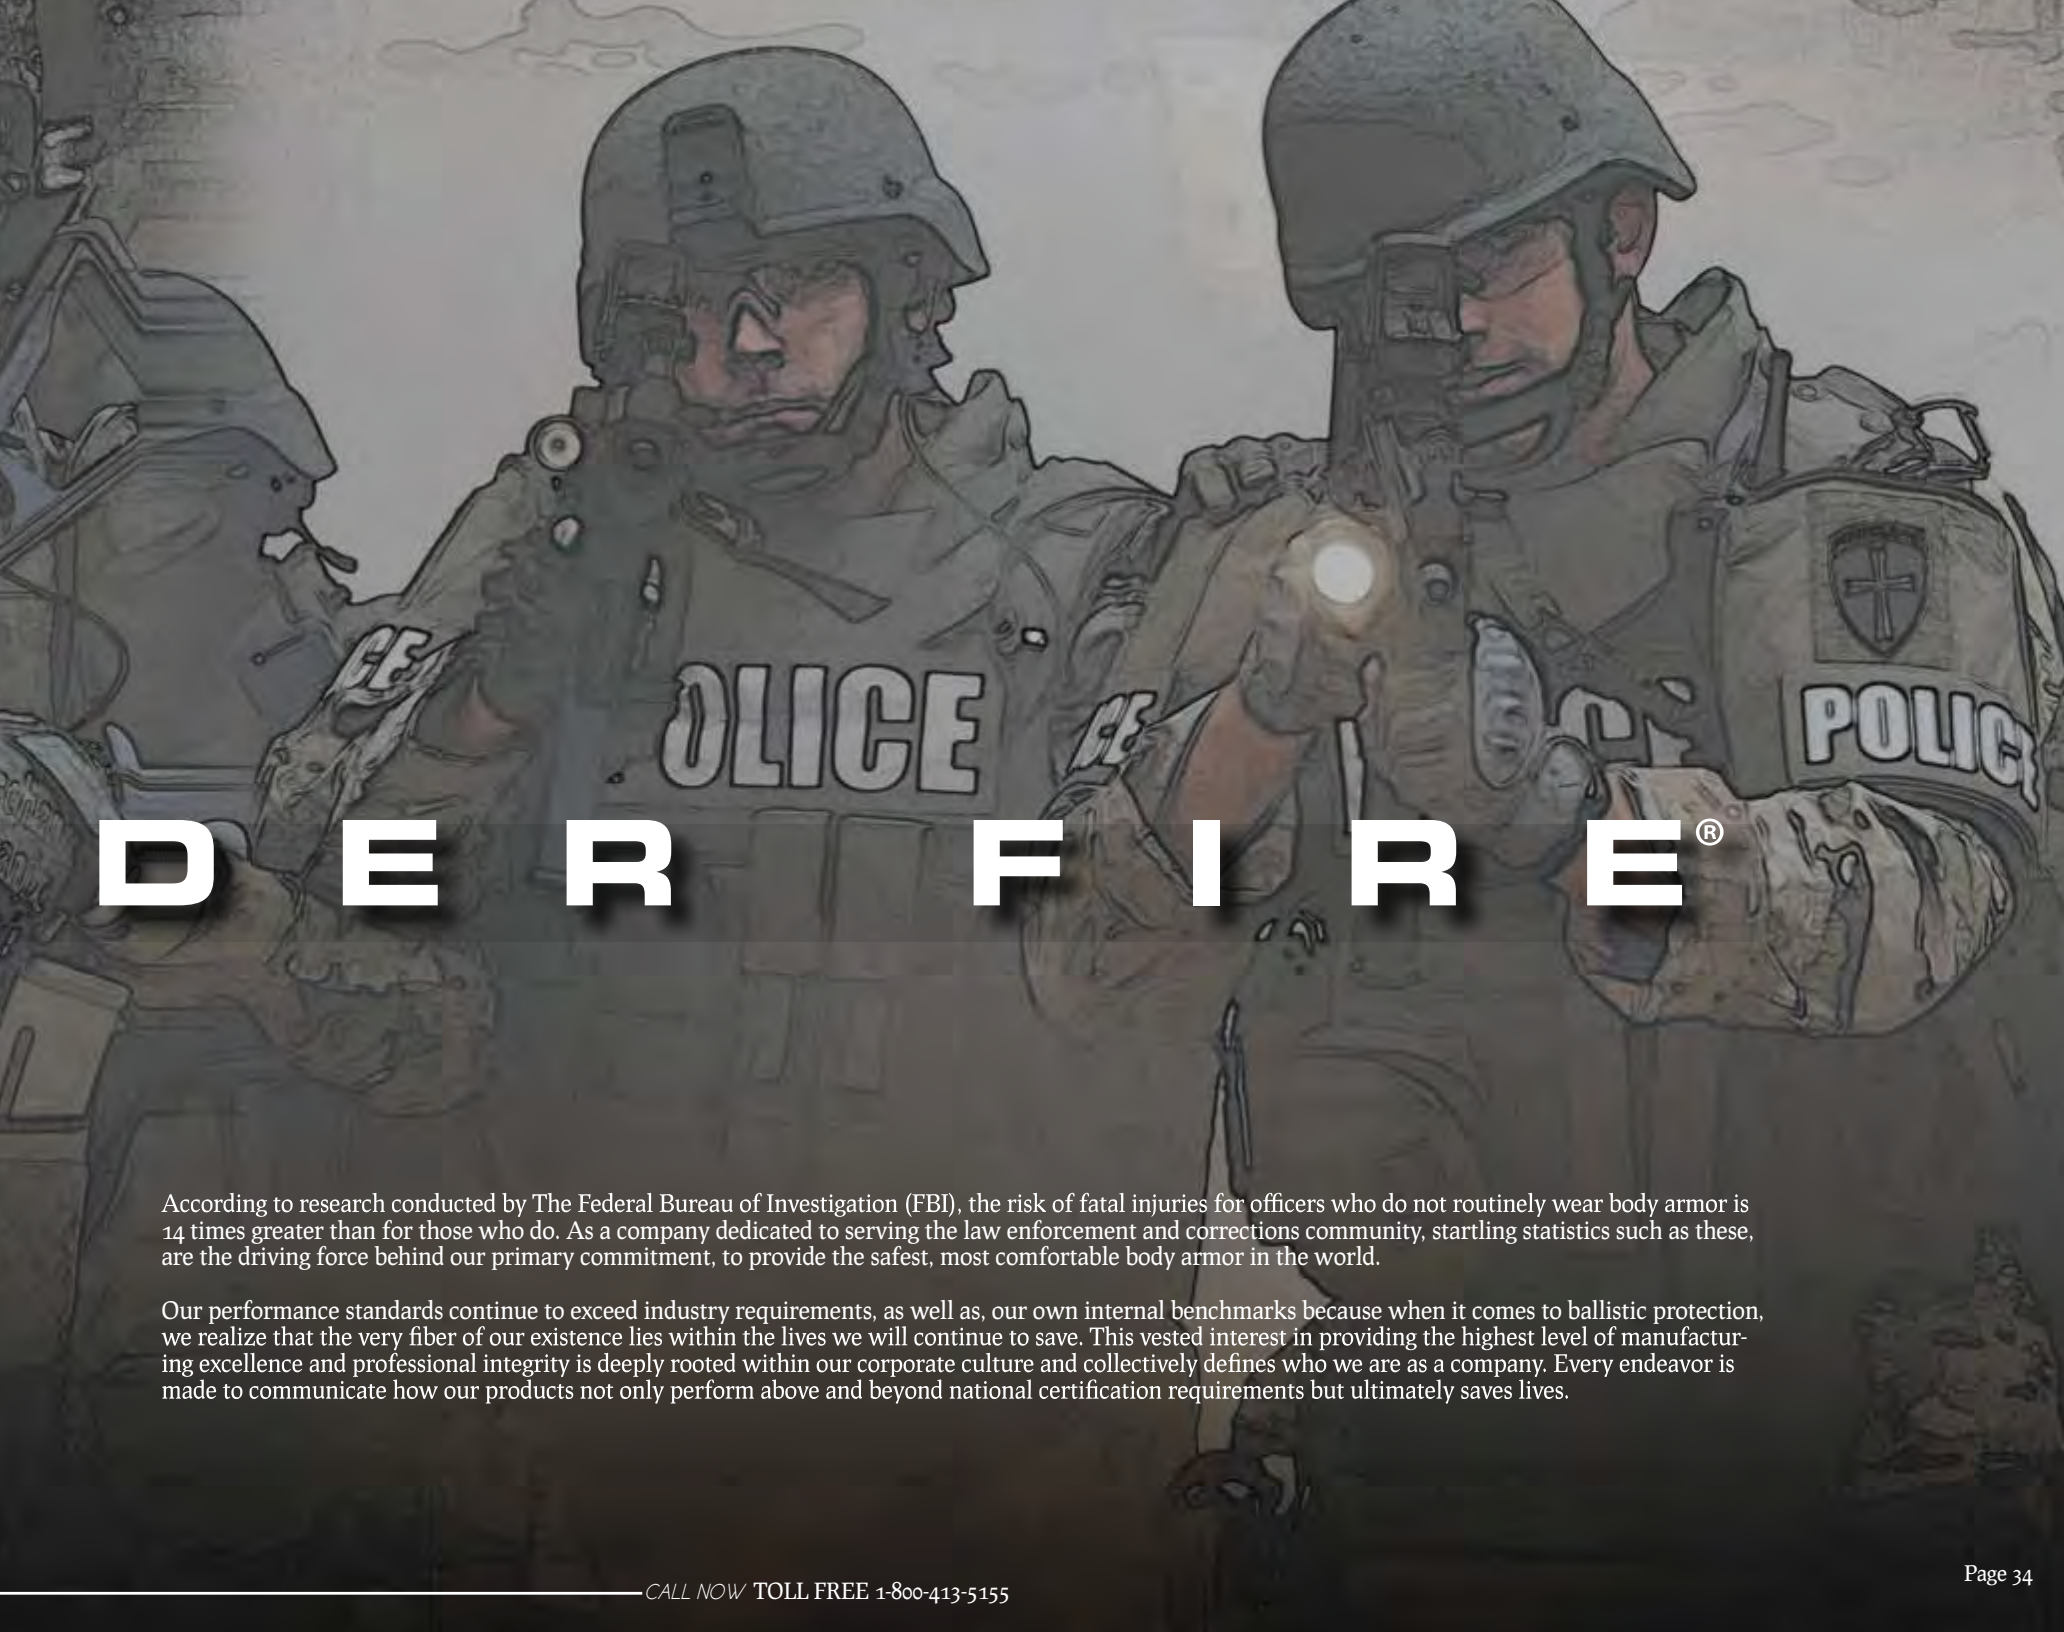

- 4 point .75" nylon webbing retention
- Large nape pad
- Heavy duty chin strap clip
- Easily removable for cleaning
- Wide range of adjustments
- Lighter weight than any retention requiring hardware
- Available in Black, Tan, Foliage and Camo Green

PARACLETE®

P R O V E N U N

An illustration of three police officers in tactical gear. The officer in the center is holding a flashlight that is turned on, casting a beam of light. The officer on the right has a patch on their vest that features a cross and the word 'POLICE'. The officer on the left has 'POLICE' written on their vest. The background is a textured, greyish-blue.

DER FIRE®

According to research conducted by The Federal Bureau of Investigation (FBI), the risk of fatal injuries for officers who do not routinely wear body armor is 14 times greater than for those who do. As a company dedicated to serving the law enforcement and corrections community, startling statistics such as these, are the driving force behind our primary commitment, to provide the safest, most comfortable body armor in the world.

Our performance standards continue to exceed industry requirements, as well as, our own internal benchmarks because when it comes to ballistic protection, we realize that the very fiber of our existence lies within the lives we will continue to save. This vested interest in providing the highest level of manufacturing excellence and professional integrity is deeply rooted within our corporate culture and collectively defines who we are as a company. Every endeavor is made to communicate how our products not only perform above and beyond national certification requirements but ultimately saves lives.
